

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

# Milne's Second Course in Algebra

By WILLIAM J. MILNE, Ph.D., LL.D.

*With or without answers. Answers also separate. Key for teachers*

**A**FTER a brief but thorough review of First Year Algebra, the following new subjects are most carefully developed: involution, evolution, exponents, and radicals, quadratic equations including graphic solutions, properties of quadratic equations, interpretation of results, arithmetical and geometrical progressions, and such supplementary topics for optional study as cube root, variation, logarithms, and complex numbers. A general review is given at the end.

The problems are based on interesting facts gathered from a variety of sources, including physics, geometry, and business, while a few others of a traditional character are included.

The unequaled extensiveness of the drill with emphasis on equations and problems constitutes one of the most marked features of this book. The treatment of graphic solutions, after rather than before the algebraic solutions, makes it possible for the pupil to view them as an interesting sidelight without allowing them to confuse his understanding of other methods.

# Unified Mathematics

By KARPINSKI, BENEDICT and CALHOUN

Embodies the following valuable features:

1. Emphasis on computation. Particular attention is given to significant figures, and to the determination of limits of accuracy.
2. Diagrams appear consistently on cross-section paper; graphical methods are stressed, as well as graphical checks on computation.
3. Practical applications make clear the value of the theoretical mathematical work.
4. Railroad curves are treated in a separate section employing the terminology of the ordinary civil engineer's handbook.
5. Interest and annuity tables appear for the first time in any freshman text. This material is invaluable for the engineer, as well as for the student of business administration.
6. Timing exercises, somewhat similar to standard tests employed in elementary arithmetics, appear for the first time in any college text.

# Modern Junior Mathematics

By MARIE GUGLE, *Assistant Superintendent of Schools*, Columbus, Ohio

**M**ODERN JUNIOR MATHEMATICS is a three-book series for seventh, eighth, and ninth grades or for junior high schools. In these books you will find a practical and workable plan for teaching correlated mathematics.

The pupil who has completed the three books of this series, will have acquired a definite idea of the part mathematics plays in affairs of men in the workaday world. He will have made a limited survey of the complete elementary field. He will have acquired an understanding of many mathematical tools, and masterly skill in the use of a few of them. His knowledge of all of them and their uses will be so broad that whenever later need arises, whether in the drafting room, the shop, the factory, or senior high school, he will know what he needs or how to find it.

---

## AUTHORITATIVE OPINIONS

Miss Gugle's mathematical textbooks are of such great value and of so unique a character that they deserve all the publicity possible. CHARLES M. TURTON, *Business Manager*, "School Science and Mathematics"

The books are excellent. I wish I were a boy again to study mathematics with their aid.  
*A District Superintendent of Schools*, New York City

The texts appeal to me as a distinct contribution of value to this field. The material is live and interesting and valuable. LOUIS C. KARPINSKI, *Associate Professor of Mathematics*, University of Michigan

The books have many new elements which will appear startling to the conservative teacher, but should be accepted by the progressive at once.

"SCHOOL," New York City

I want to pronounce the verdict of "well done" upon Modern Junior Mathematics. The series is very much to my liking. Your correlation of number and space in the second book is unique. PROFESSOR OF MATHEMATICS, A Well-known Normal School

# ANALYTIC GEOMETRY

BY

EDWIN S. CRAWLEY AND HENRY B. EVANS  
PROFESSORS OF MATHEMATICS IN THE UNIVERSITY OF PENNSYLVANIA

xiv+239 pages; 7½ x 5 inches. Price, \$1.60

---

## BY EDWIN S. CRAWLEY

Elements of Plane and Spherical Trigonometry, fourth edition, revised 1914, vi+190 pages, 8vo.	Price, \$1.10
The same, with five-place tables	Price, \$1.60
Short Course in Plane and Spherical Trigonometry, 121 pages, 8vo.	Price, \$1.00
The same, with five-place tables	Price, \$1.50
Tables of Logarithms, to five places of decimals. Eight tables, with explanations. xxxii+79 pages, 8vo.	Price, \$.90
One Thousand Exercises in Trigonometry, with answers. vi+70 pages, 8vo.	Price, \$.75

Sample copies of any except the last will be sent for examination upon request.

Address orders for any of these books to

E. S. CRAWLEY

UNIVERSITY OF PENNSYLVANIA - PHILADELPHIA, PA.

*The teachableness of these books has been tested and demonstrated by their use in many colleges and universities*

# Mathematical Special—Premier of the Profession

## No Other Typewriter Can Do This

Enables the *amateur* to write as neat appearing letters from the very beginning as the experienced operator.

The "Mathematical Special" model of the MULTIPLEX HAMMOND carries 120 distinct characters; about 30 additional ones can be made with simple combinations. "No other typewriter can do this." It has no equal in the mathematical profession.

## Aside from these remarkable features, every MULTIPLEX HAMMOND "WRITING MACHINE"

carries two different styles of type, or two languages, in the one machine. "Just Turn the Knob" and change. There are more than fifty different languages in many sizes and styles which can be substituted in a few seconds.

The first paragraph, and the one following, show a few of the 365 different arrangements of types and languages (slightly reduced) *instantly changeable on the Multiplex Hammond:*

### A Revelation in Typewriterdom

The Multiplex Hammond is unquestionably the most remarkable typewriter in existence. Why? *Because of its versatility.*

Think of it—"Just Turn the Knob" and you can change from ordinary Roman to Italics—INSTANTLY—or from large Gothic to Miniature—INSTANTLY—or from English to Russian—INSTANTLY!

Note the 10 styles of type opposite, all written on the same machine.

Petite - for extra condensing  
Miniature - for refined letters  
Small Roman - neat business  
Script - private correspondence  
Medium Roman - general letters  
Italic - emphasizing  
SPECIAL GOTHIC - CLEAN CUT  
Large Gothic - sermons, lectures  
Large Roman - sermons, lectures  
Clarendon - new, attractive

### Writes Anything, Anywhere, Any Way!

Business executives, sales managers, doctors, lawyers, advertising men, writers, druggists, linguists, students—men, women and children in all walks of life—find they can do clearer, cleaner, better work on the Multiplex Hammond. Tell us what your business or vocation is and our Service Department will give you free, full details of the particular Multiplex Hammond that is best adapted to your needs.

Our new mathematics folder will be sent to you, free. Write for it now—sign and mail the Coupon below, and mail to—
